Profile

Geophysics graduate specializing in Geoinformatics with experience in GIS analysis, WebGIS development, spatial database management, and geospatial application development. Skilled in spatial analysis, land suitability assessment, WebGIS implementation, and AI integration for geospatial decision support systems. Proficient in ArcGIS, QGIS, Python, PostgreSQL/PostGIS, and modern GIS technologies.

Education

- **Bachelor of Geophysics (S.Si) Hasanuddin University**

Core Skills

- ArcMap
- QGIS
- Spatial Analysis (Overlay, Buffer, Interpolation, Raster Analysis, Terrain Analysis, Suitability Analysis)
- PostgreSQL / PostGIS
- MySQL
- Spatial Data Management
- WebGIS Development (Flask, Leaflet, Folium)
- Python Programming for GIS Applications
- AI Chatbot Integration (RAG, n8n, Supabase)

Experience

Junior Web Developer - PT Geocode Smart Solution

2025

- Developed WebGIS platforms such as GeoAI Barru, Geopangansidrap, and Sijagung.
- Designed and implemented AI chatbot features using n8n and Supabase to enhance user interactivity.
- Worked with PostgreSQL/PostGIS and MySQL for spatial data management.
- Developed and improved UI/UX for GIS applications using Leaflet and Folium.

Intern – UPT PLN Makassar

2025

- Developed a spatial distribution map of High-Voltage Transmission Towers (SUTT) in Makassar City.
- Created a landslide susceptibility map for each SUTT location in Makassar City.

Field Surveyor – OPLAH (Land Optimization) Project, Sidrap Regency

2025

- Conducted field surveys to map agricultural farmer groups (POKTAN) using geospatial data collection techniques
- Collected and validated spatial and attribute data for each mapped area

Intern – Kedaireka MKMB, Barru Regency

2024

- Collaborated with the Barru Regency Government under the Kedaireka MBKM program to develop a WebGIS platform for agricultural land suitability analysis.
- Assisted in building an interactive WebGIS system to support local stakeholders in improving agricultural resource efficiency and land-use decision-making.

Award & Achievement

- **Gold Prize – ACRS 2025 (Asian Association on Remote Sensing)**

Awarded for the project “WebGIS-Based GeoAI Application for Agricultural Land Governance in Barru Regency, South Sulawesi, Indonesia” presented at the 44th Asian Conference on Remote Sensing (ACRS 2025).
